SUMMARY

Enthusiastic and highly motivated AI Engineer with experience in applying data science methodologies to solve real-world problems, seeking a Data Science Intern position. Proficient in Python, R, and machine learning techniques. Eager to contribute to a data-driven environment and expand knowledge in statistical modeling, data analysis, and predictive analytics.

SKILLS

- Python
- SQL
- Data Analytics
- Statistical Modeling
- Tableau
- Teamwork
- Adaptability
- Langchain
- R Programming
- Machine Learning
- Data Visualization
- Excel
- Communication
- Problem-solving
- RAG
- Prompting

EDUCATION

Bachelor of Technology -Artificial Intelligence & Data Science, CGPA: 8.3 2025
Saveetha School Of Engineering

Higher Secondary, CGPA: 8.6 2021
Chennai Public School, Chennai *Chennai*

Secondary, CGPA: 7.2 2019
Chennai Public School, Chennai *Chennai*

EXPERIENCE

Data Science Intern Sep 2024 - Nov 2024
GradTwin Services Private Limited

- Participated in a three-month data science internship, gaining practical experience in data analysis and modeling.
- Applied data science methodologies to address specific project goals, demonstrating problem-solving skills and technical proficiency in data manipulation and analysis.
- Received recognition for dedication and impactful contributions, effectively bridging academic knowledge with practical industry applications in data-driven decision-making.

AI Engineer **Oct 2025 - Present**
Xerago *Chennai, Tamil Nadu*

- Developed and deployed production-grade AI systems, leveraging LLMs and RAG pipelines, contributing to client project success through data-driven insights.
- Designed scalable RAG architectures to enhance response quality and reduce hallucinations, demonstrating proficiency in optimizing data retrieval strategies.
- Developed and orchestrated LLM workflows using LangChain for complex reasoning and tool integration, improving data processing efficiency.
- Engineered evaluation and testing frameworks to ensure reliable and high-quality data outputs, contributing to data accuracy and integrity.
- Integrated backend systems (PostgreSQL, APIs) to facilitate end-to-end data deployment, from development to live production environments.
- Utilized Cursor for rapid AI development and prototyping of LLM applications, accelerating data-driven solution delivery.
- Delivered client-facing AI solutions with a strong focus on performance, scalability, and real-world usability, ensuring effective data utilization and impact.
- Delivered production AI systems with improved response accuracy and low-latency performance, enhancing data accessibility and user experience.

CERTIFICATIONS

- International Conference, 03/2024: Presented research on Color Blindness Prediction at SA Engineering College, showcasing data analysis and modeling skills.
- Online Certification, 02/19/2024 - 03/27/2024: Completed a masterclass on Artificial Intelligence organized by NoviTech R&D Private Limited, enhancing knowledge of machine learning and AI techniques.
- Workshop, 01/2024: Expanded expertise in Artificial Intelligence and Data Science at an extensive Data Science workshop at IISC College, Bangalore, focusing on data analysis and statistical modeling.
- Workshop, 30/12/2021: Attended a one-day offline workshop on Internet of Things applications using Machine Learning, organized by Saveetha School of Engineering, learning about data-driven IoT solutions.

PROJECTS

- Smart Kitchen Grain Dispenser with Gesture Jun 2024: Implemented gesture recognition for an intuitive user interface, optimized grain dispensing algorithms to reduce waste, and ensured precise portion control through data analysis and sensor integration.
- Color Blindness Prediction Sep 2023: Evaluated KNN, Logistic Regression, SVM, Decision Trees, and Random Forest algorithms, optimizing color blindness prediction models using Python and scikit-learn, and analyzing performance metrics to improve accuracy.
